DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 7, 8, 16, 17, 19, 20, 21 and 23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by
U. S. Patent No. 7,203,507 to Smith et al.

As per claims 1, 7, 8, 16, 17, 19, 20, 21 and 23, Smith et al. disclose receiving a session request, in response to receiving the session request(see at least the abstract and col. 3, line 55 to col. 4, line 12).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-6, 9-15, 18 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. as applied to claims 1, 8, 17 and 20 above, and further in view of the examiner taking official notice.

As per claims 2, 3, 9, 10, 18 and 22, Smith et al. do not specifically disclose the limitations of these claims. The examiner, however, takes official notice that these elements are well known in the art of security systems. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Smith et al. since they comprise very well known elements necessary for the entire system to function in a secure and controlled environment.

As per claims 4, 5, 11 and 12, Smith et al. do not disclose the elements. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Smith et al. for the same reason as stated above.

As per claims 6,13,14 and 15, Smith et al. do not disclose these features either and the identical obvious reasons apply here as stated above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
